PROFESSIONAL OBJECTIVE

Computer Science student with hands-on experience in application development, interactive projects, and data-driven social media work. Seeking a software development internship to apply problem-solving skills, learn from real-world projects, and grow as an entry-level developer.

SKILLS

Languages: Java, Python, C#, SQL
Developer Tools: Visual Studio Code, Unreal Engine, Huawei eNSP
AI-Assisted Development: ChatGPT (debugging, documentation, optimization), Google Gemini
Productivity Tools: Office 365, Canva, Google Workspace

PROJECTS

Prepaview: A gamified mobile application of job interviews for job seekers with ConvAI integration | *Map Designer and Back-End Developer*

About: Prepaview is a simulation game where players interact with AI-driven HR interviewers that ask career-specific interview questions, allowing users to practice responses in a realistic interview setting

- Designed interactive game maps and character models to support a gamified job interview experience
- Improved user experience by creating intuitive navigation flows across game menus
- Used AI tools to assist debugging timing issues and validating AI behavior

WORK EXPERIENCE

Noble Living | *Social Media Management* 2022

- Managed posting and engagement for motivational content on social media platforms
- Created visual quote slides and scheduled pre-recorded video content
- Analyzed basic engagement metrics to improve content strategy

Scott Bigley, CFEd | *Lead Generation* 2024

- Researched and organized LinkedIn-based lead data using manual and automated collection methods
- Analyzed engagement metrics to determine high-performing content formats and posting strategies
